

IPS Video Solutions in City of Rovinj

For the video surveillance, the municipal administration of the Croatian town Rovinj trusts in IPS Video-Manager and IPS VideoAnalytics. In the urban area, more than 30 cameras have been installed to prevent criminal offences and to increase the sense of security in the population. These are displayed, recorded and controlled by a comprehensive IPS VideoManager VMS. Additionally, the system has been equipped with IPS Motion Detection for automatic recording control. This enables the effective surveillance of areas at risk and the reliable recording as well as easy retrieval of incidents upon request.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.
