

# IPS Video Solutions in Historical Museum of Berne

For the very first time, an entire detachment of genuine terracotta warriors from the imperial tomb of Qin Shi Huangdi is visiting Switzerland. For the major exhibition “Qin – The eternal emperor and his terracotta warriors”, the Historical Museum of Berne relies on IPS VideoManager and IPS VideoAnalytics. With the aid of IPS VideoManager NVR, all the pedestrian traffic flow is monitored and the security control room is able to organise a controlled evacuation in the event of an emergency. In addition, the video surveillance system provides with IPS Motion Detection the possibility for automatic recording control and event-related re-recording research.

## IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.
